

Westafix, winch and draw pad

WINCH AND DRAW PAD

Description

Simple solution that protects flue partition walls during a mortar pour.

Area of use

Westafix is an inflatable fixing tool that is lowered and fills the flue(s) adjacent to the one to be poured. Well thought out and strong dividing wall support. Start section supplied complete with connection hose and end cover with sweep's plumb.

Accessory

- Winch/stand/aluminium wire.
- Complete with 15m wire.
- Draw pad
- Expander bellow
- Draw/protective bag
- Draw/Connection kit

Superstructure kit: Easily connected using a quick coupling. The plumb is easily moved from the start section to the superstructure kit.

Connection: Easily connected to the regulator kit for air supply
