WESTAFLEX RAT STOPPER – SOLVES THE PROBLEM FOR GOOD

Rats can enter buildings and affect both our accommodation and us, as people. They thrive in damp environments, often getting in via the sewage system, and then make their way into living areas, restaurants, grocery stores or other premises.

Now there is an easy way to "close the door on rats for good". Westaflex has developed the Rat stopper, a clever waste pipe that is impossible to get past. The pipe has "walls" that are angled outwards. These prevent the rats from climbing any further.

Pesticides or other repetitive measures are no longer needed. Westaflex Rat stopper is a long-term, safe solution. Available for waste pipes and drainpipes. For use in tight spaces, on walls or in corners.

Westaflex rat stopper can be installed in all waste pipes, new and old. The pipe is made of stainless steel and is therefore maintenance-free.

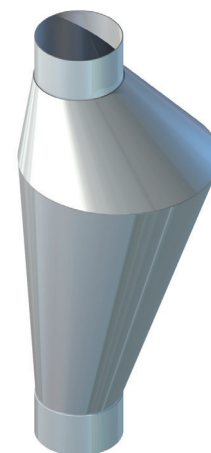

Installation can be carried out using standard tools by a building's janitor/ caretaker.

Models

Part no.	DN	H X W X L
000RS60 Symmetrical	100	600 x 250 x 250
000RS61 Symmetrical	125	600 x 250 x 250
000RS62 Symmetrical	160	600 x 300 x 300
000RS63 Symmetrical	200	600 x 300 x 300
000RSA60 Asymmetrical	100	600 x 250 x 250
000RSAR60 Asymmetrical	100	740 x 250 x 250

*Material: Stainless steel sheet 1.4301 2R III D.
Material thickness: 1.5 mm*
